CAREER OBJECTIVE

Motivated and enthusiastic 2nd-year B.Tech Computer Science (AIML) student seeking an internship opportunity to apply skills in programming, web development, machine learning, software development, and robotics. Passionate about contributing to real-world projects, learning industry practices, and gaining hands-on technical experience.

EDUCATION

Symbiosis Institute of Technology, Nagpur

2024 – Present

B.Tech in Computer Science and Engineering (Specialization in AI & ML)

Current Year: 2nd Year

EXPERIENCE

Elevate Labs

Completed

Web Development Intern

Remote

- Developed responsive and user-friendly web applications using HTML, CSS, and JavaScript
- Worked on real-world development tasks using Git and GitHub for version control
- Gained practical experience in professional web development workflows

PROJECTS

Smart Gas Detecting Rover using ESP32

- Developed a mobile robotic rover using ESP32 and gas sensors for hazardous gas detection
- Implemented safety automation, alert system, and live monitoring capabilities
- Designed for industrial and household safety applications
- Patent Published: "System and Method for Autonomous Hazard Detection and Safety Automation Using Mobile Robotic Platform" | Patent Application No.: 202521125538 A (India) | Publication Date: 02/01/2026

AI Resume Builder

- Built an AI-based resume builder that provides suggestions and improvements based on user input
- Implemented intelligent recommendations for skills, formatting, and content optimization
- Designed an interactive web interface using HTML, CSS, and JavaScript

ESP32-Based IoT Firewall

- Designed a lightweight IoT firewall to monitor and filter network traffic
- Implemented real-time anomaly detection and threat monitoring
- Built a web-based dashboard for security logs and analysis

TenderBlock

- Built a decentralized tendering platform using React, Node.js, MySQL, and Flow blockchain
- Implemented transparent bid submission and evaluation workflows on-chain to eliminate tampering
- Designed a full-stack architecture with a responsive frontend and RESTful backend API

MemoryLens

- Developed an AI-powered local search assistant for intelligent document and photo retrieval
- Enabled natural-language memory cue-based document search (e.g., "the budget file from last quarter")
- Implemented face-based photo matching – upload one reference photo to find visually similar faces

- Built with a React frontend and FastAPI backend with dedicated indexing and search pipelines

CERTIFICATIONS

- Introduction to AI and ML – Infosys Springboard
- Data Structures and Algorithms using Python (Part 1) – Red Hat
- Red Hat System Administration I (RH124 - RHA) - Ver. 10 – Red Hat

TECHNICAL SKILLS

Programming Languages: C, Python

Web Technologies: HTML, CSS, JavaScript, React, Node.js

Developer Tools: Git, GitHub, Visual Studio Code

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning (Basics), Embedded Systems (Basics)

ACHIEVEMENTS & ACTIVITIES

- Participated in hackathons: CodeHunt, HackAShastra
- Co-Coordinator, SMARTECH (Robotics) Club
- PR Volunteer, Hack4Brahma Hackathon
- Member, NCC (Naval Unit)
- Regularly practicing Data Structures and Algorithms to improve problem-solving skills
